

## Disclaimer

The following applies to all Schaffner standard catalog products worldwide, irrespective of the country and area of application:

1. Schaffner publications contain statements about the suitability of products for certain areas of application. Schaffner points out that those statements are solely recommendations and cannot be regarded as binding statements about the suitability of Schaffner products for a particular customer application. Product applicability must ultimately be determined on a case by case basis either by the customer or the party that is installing the product and putting it into operation on behalf of the customer. Neither Schaffner nor its subsidiaries will assume liability for any consequential downtimes or damages resulting from the improper use and/or application of standard catalog products.
2. Schaffner specifically points out that the above-mentioned catalog products are exclusively commercial off-the-shelf (COTS) products. They are not intended for custom-built use and are furthermore not made e.g. for military-, air- and space applications. Neither their specifications nor the processes involved meet the requirements of dedicated standards such as MIL or ASA.
3. Malfunctions for example of electrical or electronic components or failures before the end of the usual service life cannot be completely ruled out in the current state of the art, even if operated as specified. In applications requiring a very high level of operational safety and especially if a malfunction or failure of an electrical or electronic component could endanger human life or health, damage property, the environment, cause production loss or similar damages, it must be ensured by means of suitable design of the customer application or any other potential action by the customer that no injury, damage or similar type of loss is sustained by the customer or third parties in the event of aforementioned malfunctions or failures.
4. Guidelines, warnings, cautions and product-specific notes that are published in Schaffner user manuals, product datasheets, installation instructions, catalogs and other on- and offline publications, including the present disclaimer, as well as those directly printed on the product, must be observed and implemented. Schaffner reserves the right to supplement, modify or delete the content of such information at any time without prior notice and explanation of reasons. In case no such information is available, it is deemed to be the duty of the customer to seek the assistance of the next Schaffner representative.
5. Products supplied by Schaffner are intended for professional use only. Any type of handling such as installation, start-up, operation and maintenance have to be carried out by trained, experienced and certified professionals who are aware of the voltages, currents and temperatures involved and are familiar with safety procedures in electrical systems in general as well as with specific products of Schaffner.
6. For technical reasons, some of the products may contain substances subject to restrictions in certain countries e.g. because they are classed as hazardous. In case of specific questions, please contact the next Schaffner representative or sales office in due time. However, Schaffner shall under no circumstances be liable for any damages resulting from such substances and/or consequential restrictions.

7. Products described in Schaffner publications as well as their specifications are subject to change without notice. Schaffner reserves the right to change raw materials and suppliers any time, and to discontinue production and delivery of products at its own discretion. Schaffner cannot guarantee the availability of all published products at all times and is therefore not responsible for any resulting production loss or similar damages.
8. No elements in Schaffner publications shall constitute or be construed as a binding offer unless such intention is declared clearly and unambiguously.
9. Unless otherwise agreed in individual contracts, all orders are subject to the most recent version of the general terms and conditions of Schaffner. Should parts of this disclaimer conflict with the legal framework of Schaffner, the validity of such other provisions shall not be affected.
10. The contents of any publication of Schaffner are protected by intellectual property rights. It is therefore prohibited to reproduce (partial or complete), transmit, modify or use any such information for public or commercial purposes without the prior written consent of Schaffner.
11. The use of this website and Schaffner publications in general does usually not require the disclosure of personal data. In case it is necessary to collect personal data such as name or email address, Schaffner solely uses the data for the stated purpose. Schaffner will not deliver personal data to third parties without prior written consent.
12. Any publication shall be governed by, and construed in accordance with substantive Swiss law, to the exclusion of the United Nations Convention on the International Sale of Goods (CISG). Any dispute or claim arising out of or in connection with Schaffner publications shall be settled by the responsible courts at the registered office of Schaffner Holding AG. However, Schaffner reserves the right to take legal action at the customer's place of jurisdiction.
